## NEW HORIZONS BRING NEW POSSIBILITIES

It's a funny thing about horizons ... you never know what's waiting just over the edge. Viewed through hope, the dawn brings unexpected opportunities ... even within a pandemic. Like many, Saint Francis Ministries found ourselves inspired to find fresh ways of collaborating with clients, stakeholders, and each other. We've also sought new ways to build community, strengthen relationships, and safeguard the children and families we serve. Their care will always be our highest priority. Throughout the process, we've discovered much about ourselves and explored exciting possibilities of service.

*And that's the other thing about horizons ... possibility.*

Even as we continue to adapt and innovate, new vistas are revealed – from Texas and Nebraska, where we have begun significant expansions of services, to our hometown, where we will soon be moving our corporate office to the campus of the former St. John's Military School, now known as St. John's Ministry and School.

Each move and each change promises more possibilities –  
**to learn, to grow, and to serve together.**
