Saint Francis Ministries uses evidence-based practices to provide healing to children, families, and individuals. Our fundamental mission, though, is to support those we serve through hope.

Hope changes people. Hope changes the future.

Saint Francis Outpatient Behavioral Health offers confidential, compassionate care in the following areas:

- Substance Use Assessment, Outpatient Treatment, Intensive Treatment, Medication Assisted Treatment
- Mental Health Counseling
- Psychiatric and Medication Management Services
- Psychological Testing

We offer Telehealth services throughout the state of Kansas— so you get the care you need when you need it.

Outpatient Behavioral Health

Building HOPE through compassionate care

Saint Francis MINISTRIES

Mental Health Therapy

Individual – Family – Group Treatment

Saint Francis Behavioral Health professionals provide the highest level of care to our clients, whether in-person at offices in Wichita or Salina or in the comfort of your own home through state-of-the-art Telehealth delivery. Our therapists and psychologists use evidence-based and emerging practices to soothe emotional turmoil and provide skills that support a healthy lifestyle. With an integrative approach to care, our clinicians customize your treatment to help you achieve your mental health goals in the shortest time possible. We treat individuals of all ages as well as couples, families, and groups.

Psychological Testing

While a brief clinical interview is often sufficient for a mental health diagnosis, more comprehensive evaluations may be necessary for other issues. We offer psychological evaluations for a wide range of issues including:

- Comprehensive Diagnostic Evaluation
- Competency Evaluations
- Vocational Assessment
- Fetal Alcohol Syndrome Diagnostic Assessment
- Personality Testing
- Sexual Behavior Assessment
- Parenting or Guardianship Evaluations
- Trauma Assessment
- Autism Spectrum Assessments

Substance Use Assessment, Outpatient Treatment, and Intensive Treatment

The Saint Francis outpatient program is designed for adolescents and adults who are identified as having or possibly having a substance use history. We offer outpatient treatment services in Salina and can provide virtual services across Kansas.

You'll find support, help, and HOPE through Saint Francis':

- Substance use assessment
- 1st and 2nd DUI assessments
- Crisis management
- Drug screening
- Individual, family, and group counseling
- Support for adolescents in developing lifestyle habits to promote abstinence and recovery
- Family incorporation into the treatment process
- Intensive Outpatient Services
- Nonviolent drug offenders accepted as an alternative to incarceration as part of Senate Bill 123
- Collaboration with local district courts to provide services for families with truant children
- Peer Mentor Services
- Medication Assisted Treatment

Psychiatric and Medication Management Services

Services: Initial psychiatric evaluation, medication management, GeneSight® Psychotropic Testing, and medication assisted treatment.

GeneSight Psychotropic is a pharmacogenomic test that analyzes clinically important genetic variations in your DNA. The results of the test provide information to doctors about genes that may impact how patients metabolize or respond to certain medications.
